Hitting a Home Run for Trees in Grapevine

What does a "Tree City USA" do when over 100 trees are going to be bulldozed? The City of Grapevine elected to go to bat for them. Designated a "Tree City USA" for 22 years, the City stepped up to the plate to try to hit a home run for the trees.

The Oak Grove Ballfield Complex will undergo an extreme makeover this summer and fall. Many of the large trees are in the way of progress, so the City plans to move and replant as many of the trees as possible prior to the demolition and construction.

The larger trees, 10"-14" in caliper, will be hand dug and moved with a crane. The smaller 4"-9" caliper trees will be dug using a tree spade. All the trees will be moved to a temporary nursery adjacent to the project site. Once construction is complete, the trees will be moved back and incorporated into the new ballfield landscape plan. The transplanted trees will make an immediate impact on the look of the new ballfields.

Unfortunately, not all the trees could be moved. The design team was charged to modify the design to save as many of the large trees as

possible. In the center of the complex is a grove of Live Oak trees that are 20" in caliper. These trees would be impractical to move efficiently, but thanks to the determination of City staff and the skill of the design team, the design of the new complex was altered to save some of the Live Oak trees. The Live Oaks will be the focal point of the pedestrian plaza for the new complex. The playground design was altered as well to incorporate existing Cedar Elm and Chinese Pistache trees into the new playground area to provide shade for the children in the playground. Several of the fields' fence lines were also shortened to save several existing Post Oak trees.

The City of Grapevine truly hit a homerun for trees on this project! 🍇

Staying GREEN in Grapevine

FREE MULCH FOR RESIDENTS

Grapevine residents may pick up free mulch at the following locations: Bear Creek Park, 3230 S. State Hwy 360 (north parking lot), and at Oak Grove Soccer, Trawick Trail and Oak Grove Loop (east parking lot). The mulch is stocked in concrete bins and is self-serve. The self-service mulch is stocked in concrete bins, and residents must bring a container or pick-up truck. Distribution areas are open from dawn until dark.

Benefits of Mulch

Mulching is really nature's idea—nature produces large quantities of mulch all the time with fallen leaves, needles, twigs, pieces of bark, spent flower blossoms, fallen fruit and other organic material. Mulch is any material applied to the soil surface for protection or improvement of the area covered, and can be one of the most beneficial things you can do for your soil and plants. If you have not considered mulching your garden in the past, you may want to reconsider.

- Mulches prevent loss of water from the soil by evaporation.
- Mulches reduce the growth of

weeds, when the mulch material itself is weed-free and applied deeply enough to prevent weed germination or to smother existing weeds.

- Mulches keep the soil cooler in the summer and warmer in the winter, thus maintaining a more even soil temperature.
- Mulches prevent soil splashing, which not only stops erosion but keeps soil-borne diseases from splashing up onto the plants.
- Organic mulches can improve the soil structure. As the mulch decays, the material becomes topsoil. Decaying mulch also adds nutrients to the soil.
- Mulches prevent the trunks of trees and shrubs from damage by lawn equipment.
- Mulches help prevent soil compaction.
- Mulches can add to the beauty of the landscape by providing a cover of uniform color and interesting texture to the surface.
- Mulched plants have more roots than plants that are not mulched, because mulched plants will produce additional roots in the mulch that surrounds them.

Mulch Materials

Grass Clippings

The best use for grass clippings is to leave them on the lawn. Grass clippings will decompose rapidly, adding nutrients back into the soil. A two-inch layer of grass clippings provides weed control if they are not full of weed seeds. It is best to build up the layer gradually using dry grass — not fresh clippings — to prevent the formation of a solid mat. Be careful not to use clippings from lawns that have been treated with herbicides.

Leaves

A 2-to-3-inch layer of leaves provides good weed control. It is best to shred the leaves coarsely, using a shredder or your lawn mower.

Wood Chips / Hardwood Mulch

This material contains bark and pieces of wood of various sizes and makes an attractive mulch. A 2-to-3-inch layer of wood chips provides good weed control. Small wood chips decompose very rapidly using nitrogen from the soil, which needs to be replaced by nitrogen fertilizer. 🍇

Lawn & Landscape Watering Ordinance

Not watering your lawn during the hottest part of the day is just good water management. The City of Grapevine, by City ordinance, prohibits lawn and landscape irrigation between the hours of 10 am and 6 pm any day of the year. Exceptions are hand watering and the use of soaker hoses. The City also offers free rain/freeze guards to help conserve water. To take advantage of the rain/freeze guard program, or for any questions, please call 817-410-3330. 🍇

Don't Invite Crime!

A few changes in your everyday routine may reduce your chances of becoming a victim of crime:

- Do not keep valuables in plain sight inside your vehicle.
- Keep all vehicle doors locked when not in use.
- Do not leave your garage door opener inside your vehicle.
- Prune back shrubbery that obstructs or hides doors or windows at your home.
- Make a list of valuables such as electronics, sporting equipment, and computers. Take a photo of each item and write down the serial number.
- Keep porches, entrances and yards well illuminated. Criminals hate light.
- Install a peephole or wide-angle viewer in all entry doors to allow you to see outside without opening the door.
- Keep your yard maintained. Store ladders and tools inside a locked garage or storage shed when not in use.

For additional safety tips or information on starting a Neighbor Watch in your neighborhood or multi-housing community, please contact the following Crime Prevention Officers: Scott Rhodes at scottr@grapevinetexas.gov or 972-724-2126, Jason Keller at jkeller@grapevinetexas.gov or 817-421-2192, or Tim Gill at tgill@grapevinetexas.gov or 817-410-3209. 🍇

NEW! Online Police Report Filing

In an effort to better serve the citizens of Grapevine, certain police reports may now be filed online at <https://policereports.grapevinetexas.gov/PublicFR>, the Police Department's Online Offense Reporting System.

Following is a list of reports that may be submitted:

- Animal ordinance violation or complaint
- Burglary of a vending machine
- Criminal mischief/vandalism/disorderly conduct
- Harassing phone calls
- Lost property
- Reckless driving
- Theft (no firearms/license plates)

Certain criteria must be met for an offense to be submitted online. (1) The crime must have occurred in Grapevine and there cannot be any suspects or evidence, and (2) contact information is required. When requirements are not met, the user will be directed to call the Police Department. Once a report is submitted, the complainant receives confirmation and a report number to use in the event they need to contact the department

about the report.

Online offense reporting systems are becoming more common across the United States as agencies seek creative ways to lessen the workload on patrol officers. This added service benefits citizens as well by allowing them to file at their convenience. 🍇

Police Offer Safety Seat Inspection

The Grapevine Police Department offers parents and caregivers education and hands-on assistance with the proper use and installation of child restraint systems and seat belts. To schedule an appointment, please contact Officers Tim Gill at 817-410-3209 or Jason Keller at 817-421-2192. 🍇
